

SALT LAKE CITY **CATALYTIC CONVERTER DIAGNOSTIC** **& EMISSIONS TRAINING CLINIC**

JULY 15, 2026 / 6PM - 8PM

RESERVE YOUR SPOT - SEATING IS LIMITED!

Join Team Allied and AP Emissions for an exclusive, high-impact technical converter clinic designed specifically for automotive repair professionals, service technicians, and diagnostic specialists seeking to enhance their skills in diagnosing problems and replacing the catalytic converter.

This one-night event, led by AP Emissions Technologies Head Trainer and technical expert **Clint Cooper**, will deliver in-depth insight into converter operation, substrate efficiency analysis, emissions-related diagnostic trouble codes (DTCs), installation best practices, and the latest trends impacting the industry.

Raised in a family-owned muffler shop, Clint learned early how exhaust systems work in the real world, not just on paper. That shop-floor foundation shaped his practical, installer-focused approach to emissions control, diagnostics, and training.

Before joining AP Emissions, Clint was a college professor where he earned a reputation for well-informed presentations and an exceptional ability to explain complex technical concepts in clear, relatable terms. His teaching style emphasized understanding the “why” behind the repair, helping students grasp not only what to do, but how systems actually function. This skill defines his training philosophy in the automotive aftermarket.

Training Topics Include:

- Catalytic Converter Construction, Function and Theory
- Substrate, Catalyst Loading, Washcoat Technology
- CARB regulations, VECI label identification
- How converters break down
- Fuel Trims and the Stoichiometric Ratio.
- Catalytic Converter Diagnostics and Replacement
- Oxygen and A/F Sensor Construction, Function and Diagnostics
- AP Emissions features and benefits

Perks & Details for Participating Shops in Attendance:

- Official Training Certification awarded to all attendees
- **\$25 fee per shop. Each shop will receive a \$50 voucher** toward the purchase of a direct-fit catalytic converter
- Complimentary food and beverages provided courtesy of Team Allied Distribution
- Official guided tour of one of Team Allied’s largest distribution facilities!
- Attendees will receive an exclusive package of promotional and educational materials, including a limited-edition Team Allied Distribution Technical Counter Mat, promotional banners, the new 2026 AP Emissions printed catalog, and additional training resources designed to support your shop’s continued growth and diagnostic success!
